Unleashing the Future of Meme Tokens
with AI Magic

This Whitepaper explores and introduces Dawgz AI

THE FIRST AI-POWERED DOGGY MEME ON THE BLOCKCHAIN

Dawgz AI ($DAGZ) introduces the latest memecoin that combines the viral power of memes with cutting-edge AI-powered trading algorithms on the blockchain.

ABSTRACT

Dawgz AI ($DAGZ) merges viral meme culture with advanced AI trading technology to deliver a fun, engaging, and rewarding experience for its community. By leveraging AI to execute trades and the viral nature of memes to grow its ecosystem, Dawgz AI is building a platform that rewards users for participating in both aspects.

This whitepaper outlines the project's

- Vision
- Technology
- Tokenomics
- Roadmap
- How to participate in the presale

INTRODUCTION

The fusion of memes and artificial intelligence is redefining the cryptocurrency space, and Dawgz AI is leading the charge. With AI-driven trading bots designed to maximize yield and the community-building power of meme culture, Dawgz AI offers a unique blend of entertainment and innovation. Featured in Crypto Potato, Coinpedia, Crypto-Times, Business Insider, and Blockchain Today, Dawgz AI is poised to revolutionize the memecoin space with real AI utility.

VISION AND MISSION

Dawgz AI seeks to reshape the memecoin space by integrating AI-powered trading bots to offer tangible value, while maintaining the viral appeal of meme culture. Our mission is to foster a vibrant, engaged community where users can enjoy memes, earn from our blackbox AI trading algorithms, and earn rewards through our ecosystem.

KEY FEATURES

Meme-tastic Fun

Dawgz AI keeps the spirit of meme culture alive, encouraging users to create, share, and engage with memes. Meme contests and community events ensure Dawgz AI remains fun and participatory.

Advanced AI Integration

Our Blackbox AI trading algorithms are at the heart of Dawgz AI, and engineered by a team of elite analysts and seasoned Wall Street trading veterans with years of experience in the financial markets and algorithmic trading. The team has meticulously crafted our strategies that react to market trends in real-time, and execute trades to generate optimal yield.

Strong Community Focus

Community engagement is key to Dawgz AI's growth. We prioritize user participation through events, meme contests, and rewards that keep the community active and involved in shaping the future of the project.

Dawgz AI ($DAGZ) Token

$DAGZ is an ERC-20 token on the Ethereum blockchain, designed to power our ecosystem. The token fuels AI-driven trading, meme activities, and rewards within the platform.

TOKENOMICS

Total supply
8,888,888,888 $DAGZ

🐾 DEX/CEX Liquidity Pool		10%
🐾 Presale		30%
🐾 Marketing Fund		24%
🐾 Staking Rewards		20%
🐾 Community Rewards		15%
🐾 Foundation		1%

DISTRIBUTION DETAILS

🐾 Presale

30% of the total supply will be available for early supporters to purchase $DAGZ tokens at a discounted rate before they are listed on exchanges. Marketing fund 24% of the supply will be used for marketing campaigns and activities to increase awareness and adoption of Dawgz AI.

🐾 Liquidity Pool

10% of the supply will be allocated to liquidity pools on decentralized and centralized exchanges to ensure smooth trading.

🐾 Marketing Fund

20% of the supply will be used for marketing campaigns to increase awareness and adoption of Dawgz AI.

🐾 Community Rewards

15% of the supply is dedicated to rewarding community members through games, prizes and random acts of fun.

🐾 Staking Rewards

20% of the supply will be allocated to reward users who stake their $DAGZ tokens, promoting long-term holding and stability within the ecosystem.

🐾 Foundation

1% of the supply will be put aside for the foundation for sustaining and growing the project. This provides the necessary resources to maintain the token's infrastructure, foster a vibrant community and create strategic pawtnerships.

ROADMAP

1 Puppyhood (Conception and Launch)

Concept Development
I see you, baby. We noticed that anything Reddit ever liked (doges, kittens, butts, even gay conservative frogs) tends to blow up altcoin investor ROI on Ethereum. So we created an AI blockchain puppy that we think the Web3 sector will really enjoy profiting with

Token Creation
We created a blockchain cryptocurrency named Dawgz AI under the ticker symbol $DAGZ. It's secured and serviced by Ethereum, the world's leading and most secure smart contract blockchain

Contract Audit
We had a trusted independent smart contract auditor— Solidproof— perform a full audit of our Ethereum meme currency on June 4, 2024

Presale Launch
Fur-st Come, Fur-st Serve: Be quick, because these tokens are hotter than a dog in a sunbeam

Website and Social Media
We're going to get back to the basics of meme marketing on social media and demoralize the competition with Impact font memes

Marketing Push
It's a dog eat dog world on Crypto. As Dawgz AI grows, we're going to continue our efforts in growing the Dawgz Army

2 Growing the Pack (Building the Community)

Community Engagement
Once the project has found its proper footing after our efforts in stage one, we're going to keep the community all about pawsitive vibes

Partnerships
Meanwhile at the foundation, the Dawgz AI team will be hard at work forming strategic partnerships within the blockchain community and finding new price floors on all fours

Technology
Enhance our AI trading algorithms

Exchange Listings
We are going to work to get $DAGZ on as many exchanges as pawssible, so more can join the Dawgz Army

3 The Big Dog Stage (Expansion and Innovation)

Enhanced Features
We will work towards providing our users access to the AI trading algorithm that we have developed and build out any new use cases that may arise. We'll keep adding features as the project expands

Global Outreach
We will work towards providing our users access to the AI trading algorithm that we have developed and build out any new use cases that may arise. We'll keep adding features as the project expands

Continuous Improvement
Profit shouldn't be for any one group or kind of individual. We're building an inclusive economy, where the average retail investor can still get it in the end

4 Alpha Dog Status (Long-term Vision)

Sustainable Growth

Pumping your portfolio doggy style— with love, commitment, and loyalty. We're not interested in swiping all the inflows in a day and disappearing. We want $DAGZ to hold its weight and continue to grow with our holders

AI Ecosystem

When enough capital and computational organization coalesces together on the Internet, you can not avoid spawning new forms of AI. The question is how you want to use it. We want to use ours to maximize profits for investors with dank memes and danker trading bots

Mainstream Adoption

We're aiming for the kind of growth that big time whale investors can really get behind.

We want the kind of ROIs for our investors where the tail wags the dog and Ethereum has a big single digit day on the crypto market cap charts because Dawgz AI spent a day running deep into double digit gain territory
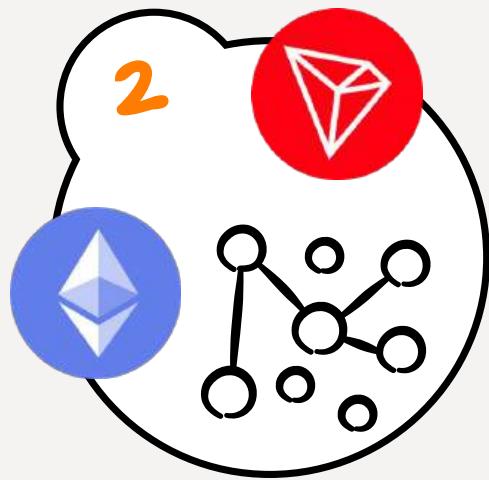

HOW TO PARTICIPATE IN THE PRESALE
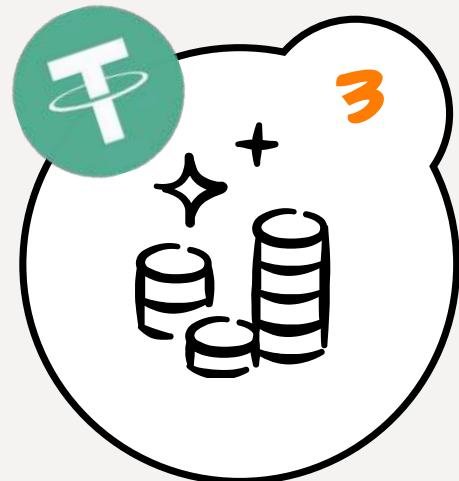

Connect Your Wallet

Locate the presale widget at the top of this webpage and connect your preferred wallet. We offer various wallet options for your convenience.

Select the Network

After connecting your wallet, you can participate in the presale on the Ethereum chain. Payments are accepted in ETH or ETH USDT.

Purchase Tokens

Enter the amount of ETH or USDT you wish to exchange for $DAGZ tokens and confirm the transaction in your wallet.

Buy and Stake

To take advantage of high staking rewards, you will have the option to stake your tokens immediately after purchase. Staked tokens can be unlocked seven days after the presale ends.

Claim Unstaked Tokens

If you opted not to stake your tokens at the time of purchase once the presale concludes, return to our website to claim your $DAGZ tokens using the same wallet and network you used to purchase them.

CONCLUSION

Dawgz AI is set to transform the meme token landscape by combining the viral appeal of memes with the cutting-edge capabilities of AI. Join us in this exciting journey and become part of a vibrant, fun, and innovative community.

FAQS – FREQUENTLY ASKED QUESTIONS

What s Dawgz AI?

Dawgz AI is the cutting-edge crypto meme project you didn't know you needed until now! Imagine a super-smart doggy that combines advanced artificial intelligence with a pawsome understanding of the power of memes. **Dawgz AI** is here to sniff out secrets and generate the cutest dog- themed memes in the meme universe. Get ready for a tail- waggingly good time as **Dawgz AI** fetches the best in AI and meme magic!

What s Dawgz AI Presale?

The **Dawgz AI** Presale is your golden opportunity to fetch **Dawgz AI** tokens at a bargain price before they hit the big leagues. Imagine grabbing those tokens for mere kibble instead of the premium steak price they'll command later. The presale comes in several stages, each lasting between 4-7 days. As each stage progresses, the price goes up, so the early bird catches the cheapest bone! Don't miss out on this tail- wagging deal before it's gone!

I bought a Dawgz AI, where can i see my token?

Staked Tokens: Your staked tokens are chilling in the Staking Menu, earning rewards like a good dog waiting for treats. Just head over there to see your stash grow!

Unstaked Tokens: Your unstaked tokens are lounging on the Buy Widget on the **Dawgz AI** homepage. Just remember to reconnect your wallet to view your woof- tastic tokens on the Buy Widget. Think of it as your token kennel where they're just waiting for their next command!

Is Dawgz AI A Meme Coin?

Dawgz AI isn't just a meme coin; it's an AI-generated meme doggy with a personality as big as a well- seasoned Shiba Inu! **Dawgz AI** is rallying a pack of fans, fondly known as the Dawgz Army. There's a new top dog in the meme park, and it's none other than Dawgz AI! Woof woof!

Can I Trust the Presale's Smart Contract Security?

Absolutely! Our smart contract has been given two paws up by **Solidproof.net**, a top dog in the world of smart contract auditing. They've sniffed out any potential issues and declared it safe and secure. So rest easy, your tokens are in good paws!

Do I Need a Crypto Wallet to Buy?

You bet your biscuit you do! To buy and claim your presale $DAGZ AI, you'll need a crypto wallet. We recommend using MetaMask, the go-to decentralized wallet for both crypto newbies and seasoned pros. It's as easy as teaching an old dog new tricks!

Once you've set up and added funds to your Best Wallet, simply connect to the widget at the top of the page and fetch yourself some presale **$DAGZ**. Easy peasy, pup squeezy! **Dawgz AI** - Where Meme Magic Meets AI Innovation. Get ready to wag your tail into the future!
